PROFESSIONAL SUMMARY

Backend Developer with over 2 years of professional experience building and maintaining PHP/Laravel applications, including a multi-tenant web platform serving Android and iOS mobile clients through RESTful APIs. Skilled in full-stack development with Vue 3, Inertia.js, TypeScript, and Tailwind CSS, and experienced in production support, root cause analysis, bug fixing, and deployments. Proven ability to deliver end-to-end products independently, including POS, booking, and inventory management systems with integrated payment processing.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL (MySQL), HTML, CSS
Frameworks & Libraries: Laravel, Vue 3, Inertia.js, Tailwind CSS, Filament, Laravel Nova, PrimeVue, Node.js, FastAPI
APIs & Integration: REST API Design & Development, Swagger/OpenAPI, Laravel Sanctum, Payment Gateway Integration
Tools & Platforms: Git, Docker, Postman, Playwright, Jira, ServiceNow

WORK EXPERIENCE

Backend Developer — **CoreProc, Inc.** — Taguig City, Philippines (Remote) | **Dec 2024 – Present**

- Develop and maintain backend systems using PHP/Laravel across multiple projects, currently focused on a multi-tenant web platform whose REST APIs are consumed by Android and iOS mobile applications.
- Serve as client-facing first-level support, resolving user-reported issues and managing tickets through Jira and ServiceNow.
- Investigate and resolve production issues through root cause analysis, implement bug fixes, and support production deployments to ensure system reliability and uptime.

Full Stack Developer Intern — **SPLACE** — Davao City, Philippines | **Feb 2024 – May 2024**

- Independently designed and built an inventory management system using PHP, jQuery, and JavaScript.
- Improved inventory tracking efficiency and strengthened practical full-stack web development skills.

PERSONAL PROJECTS

POS Management System

Laravel, Vue 3, Inertia.js, PrimeVue, Tailwind CSS, Filament, Sanctum

- Built a point-of-sale web application with product browsing, shopping cart, cash and Maya Checkout payment processing, inventory validation, and receipt generation.
- Developed an admin portal for managing products, inventory, transactions, users, and activity logs, with configurable branding, theme customization, and site name/logo management.

BookBound Booking System

Laravel, Vue 3, Inertia.js, PrimeVue, Tailwind CSS, Filament, Sanctum

- Built a booking platform where customers browse offerings, reserve time slots, and pay via PayMaya, with safeguards against double bookings.
- Developed an admin portal for managing reservations, cancellations, refunds, and merchant accounts.
